PROFESSIONAL SUMMARY

Performance-driven Software Engineer with experience in architecting scalable ERP integrations and cloud-native web applications. Proficient in Angular, .NET 8, and Azure Kubernetes Service, with a focus on building secure, high-volume data sync engines. Adept at leveraging AI-driven development tools and CI/CD pipelines to deliver high-quality code in cross-functional, Agile environments.

SKILLS

- Languages: JavaScript, TypeScript, Python, C#, Java, C++, HTML5/CSS3.
- Web Frameworks: Angular, React.js, .NET Core, Entity Framework, Dapper.
- Cloud & DevOps: Azure (AKS, Docker), AWS (EC2, RDS), Jenkins (CI/CD), Git, Vercel.
- Databases & Architecture: PostgreSQL, MS SQL Server, HBase, MongoDB, RESTful APIs, OAuth2.
- Tools & Methodologies: Jira, Slack, Zoom, Cursor (AI-Optimization).

PROFESSIONAL EXPERIENCE

InfoElegant Solution Pvt Ltd | Software Development Engineer Jan 2025 – Present

- AI-Assisted Development: Utilize Cursor and AI-driven pair programming to optimize code performance and accelerate the learning of emerging cloud technologies.
- CI/CD & Testing: Automated code validation by triggering Jenkins test suites for all feature changes, ensuring high-quality deployments to company staging environments.
- Version Control: Manage complex codebases using Git, overseeing the full lifecycle of Pull Requests (PRs) and merge requests to maintain repository integrity.
- Agile & Collaboration: Execute sprint cycles via Jira for task tracking and synchronize with teams using Slack/Zoom for daily stand-ups.
- Quality Assurance: Validate integration logic in "Playground" environments to minimize downtime in the sync middleware before production rollout.

Brainy Beam InfoTech | SDE Intern Jul 2024 – Sep 2024

- Data Pipelines: Engineered automated data pipelines and implemented Machine Learning classification models using Python.
- Predictive Analytics: Applied analytics to bank marketing campaigns, achieving 85% model accuracy and delivering insights through interactive dashboards.

KEY PROJECTS

Ceramic Factory Cost Analysis System: Cloud-based full-stack production analytics platform

- Full-Stack Analytics: Developed a centralized production tracking platform consolidating data from Packaging, Production, and Quality departments into a single source of truth.
- Automated Reporting: Engineered KPI automation for Coal and Gas usage (\$Kg/Ton\$), providing management with real-time cost-reduction insights.

Cloud-Based ERP Integration Middleware: Microservices-based ERP synchronization engine

- Architecture: Designed a modular, microservices-based sync engine using Factory Patterns and RESTful APIs for high scalability.
- Integrations & Security: Implemented OAuth2-secured flows for QuickBooks/Zoho and automated deployments via Jenkins CI/CD.

EDUCATION

Pandit Deendayal Energy University | B.Tech in Information and Communication Technology CGPA: 7.96

Maharshi Gurukul | Secondary and Higher Secondary Education Percentage: 85%
